(54) Title: A METHOD OF PRODUCING A LOW MOLECULAR WEIGHT ORGANIC COMPOUND IN A CELL

(57) Abstract: A method of producing a low molecular weight organic compound (e.g. a plant or bacteria secondary metabolite) in increased yields involving use of a microorganism cell, which comprises a gene involved in the biosynthesis pathway leading to a low molecular weight organic aglycon compound and a glycosyltransferase gene capable of glycosylating the produced aglycon.
